

Full Detailed Manual <https://gliderkeeper.com/>  
you must read as well.

**GKSync is a high precision system clock** that  
plugs into  
GliderKeeper  
expansion port.

Using GKSync will  
give accurate UTC timing of your flights and allow  
for automated competition timekeeping, in  
conjunction with GliderTimer series timekeeping  
system.

**Operation:** Plug into GliderKeeper expansion  
port. Use GliderKeeper Fw\_xxx\_1.23 or higher.

**Synchronisation:** Within 24 hours of the contest,  
make your GliderKeeper with  
GKSync connect to an internet  
capable Wi-Fi Access Point like  
your home or mobile hotspot.  
Check in GliderKeeper landing  
page for the “Successful  
Synchronisation!” by the bottom of the page. This  
may take some 30 seconds.

Device id:

D1:65:90:00 Successfull  
Synchronisation!

**Battery:** GKSync is equipped with a tiny button  
battery when it would not longer supply  
accurate timing, battery is exhausted, GKSync  
must be replaced. Battery duration should be 2-  
3 years.
